SUMMARY

Third-year Data Science student at Thaksin University (GPAX 3.18) with hands-on experience in data preparation, outlier detection, exploratory analysis, and Power BI dashboards using Python. Seeking a Data Analyst internship to turn business data into insights and decision-support reports. Available April – September 2027.

EDUCATION

Thaksin University 2024 – Present
Faculty of Science and Digital Innovation | B.Sc. in Computer and Information Science (Data Science) | GPAX: 3.18
Coursework: Python Programming, Data Science Technology, Modern Data Management, Data Structures and Algorithms, Database Systems, Business Intelligence Data Analytics (in progress).

TECHNICAL SKILLS

Data Analytics: Power BI, Power Query (Basic), Excel, Data Cleaning, Data Transformation, Outlier Detection (Z-score/IQR), EDA, Data Visualization
Programming: Python, SQL
Machine Learning: Image Classification, Data Preprocessing, Model Evaluation
Tools: PyTorch, OpenCV, Google Colab, Jupyter Notebook, Git, GitHub

PROJECTS AND RESEARCH

Regional Income Patterns and Inequality in Thailand (Power BI) 2026
- Prepared 2011–2023 government open data (data.go.th) with Python: handled missing values, detected outliers (Z-score/IQR), and built Growth Rate and Gini Index features.
- Built an interactive Power BI dashboard for income trends and regional comparison; found Bangkok highest, the Northeast lowest, and a regional Gini Index of 0.58–0.75.
- Presented at the 17th National Science Research Conference, Srinakharinwirot University; received the Very Good Award (Poster Presentation).

PetGuard AI — Image Classification Prototype 2026
- Trained a PyTorch image-classification prototype on a 9,664-image Roboflow dataset (4 classes), achieving 92.2% accuracy on the 307-image test set (283 correct).
- Preprocessed images (resize to 224×224), split them into train/valid/test sets, and evaluated the model in Google Colab.
- Used a confusion matrix to find that most errors occurred between visually similar types; proposed more labeled data and a web app.

INNOVATION AND ACTIVITIES

Outstanding Student Award for Public Service, Thaksin University 2025
TSU Innovation Pitching League 2026 2026
- Advanced to the university-level final round with PetGuard AI after passing the Campus League.

TSU Innovation Pitching League 2025 (Team Style3) 2025
- Collaborated with Team Style3 to pitch the "Smart Digital Perfume Vending Machine"; one of the winning teams awarded funding and selected for a study trip to Taiwan.
- Joined the "TSU Discover Taiwan Startup Ecosystem" program (8–11 Dec 2025), learning about startups and industrial technology with Taiwan Tech.
